## **Circular to Customers**

### **VERIFIED GROSS MASS REQUIREMENT**

You will be aware of the requirement for all containers to have a Verified Gross Mass (VGM) for them to be received for shipment,

For our customers shipping containers the VGM will need to be submitted as part of your pre-advise that is sent to the terminal prior to the container being delivered there.

Different terminals may have slightly different procedures for receiving & processing the VGM so you will need to comply with terminal operating procedures. Failure to do this will mean that your container will not be allowed through the gate and received on the wharf.

For our customers using the General Wharves at the Ports of Auckland & Mount Maunganui at the Port of Tauranga, the VGM should be submitted as part of your pre-advise if you are registered as customer of the Port but will also need to be showing on the Carters Note that is presented to our stevedores who receive the Containers into our stacks on the wharf.

For containers that do not have valid paperwork showing the VGM as declared by the shipper, access through the gate will still be granted but the containers will be weighed on site by our stevedores who will charge this cost back to the trucking company that deliver the container.

The shipper still needs to sign the declared VGM and so the carters note should be pre-signed by the shippers authorised signatory party and the VGM would need to be entered by the trucking company or stevedores who would need the shippers consent to indemnify them from any liability for having completed the VGM details which the shipper is declaring.

Failure to declare a VGM for any container will mean the cargo cannot be received for shipment and the cargo will not be authorised to load.

www.pacificforumline.com

Containers with declared VGM prior to arrival to the gate may also be re-weighed and any discrepancy will be notified to you and again may result in a container not being authorised to load due to an incorrect VGM declaration.

Any costs such as detention, demurrage and re-handling associated with cargo not having a correct VGM declared, which results in the container being short-shipped, will be charged to the shipper.

**For LCL all cargo** a VGM surcharge of NZ\$5.70 per revenue tonne will be applied from the

- Southern Lily V386
- Capitaine Wallis Voyage 62
- Imua Voyage 32

The SOLAS legislation came into effect from the 01<sup>st</sup> of July 2016.

Thank you for your continued support.

Yours sincerely
